

Family Resource Kit – My Plan.

From little things, big things grow.....

This kit began as a spark within an agency, after a sector wide meeting, funding was found to grow this spark.

Now after several months and many voices contributing, we as a group have developed the Family Resource Kit – My Plan.

The kit has been designed to be accessible. It is made up of three components:

- 1 for the children.
- 1 for the parents/carers.
- 1 for the workers.
- It is envisaged that the components maybe used individually or collectively depending the situation.
- Child/ren can be encouraged to draw or write in the boxes, providing information about themselves.
- This resource kit encourages planning and thinking ahead about the safety of the children in situations where their family life is affected by alcohol and or drug use.

For more information please access your CD and attend the one day implementation training. (see flyer)

The kit is available on CD, and on the Womens Health Services website:
